Response to Amendment

Allowable Subject Matter

Claims 7-12 are allowed.

The following is an examiner's statement of reasons for allowance:

The prior art of record neither teaches or suggests a calibration system that is used with an infant apparatus to calibrate an electrical circuit that is used in the infant apparatus to sense the temperature of an infant. The calibration system eliminates the use of one or more potentiometers that are conventionally used to carry out that calibration and, therefore, with the present system, that calibration is automatically carried out and does not require a technician to tweak or verify the calibration of the temperature sensors for each piece of infant apparatus that is manufactured and thus, not only are the potentiometers eliminated, the present invention also eliminates the time required for the technician to carry out that task on each infant apparatus.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Daniel I. Robinson whose telephone number is 703 306-9043. The examiner can normally be reached on M-F 5:30am-2:30pm.

The fax phone number for the organization where this application or proceeding is assigned is 703-872-9306.
